

COMPANY OVERVIEW FOR SUBMITTAL

Hollaender Manufacturing has been proudly manufacturing and fabricating railing in the United States since 1946. Design, engineering and manufacturing of all Hollaender products occurs in the United States and they meet all criteria for substantial transformation as outlined in the Buy American Act requirements.

Hollaender's Speed-Rail fittings are manufactured from cast aluminum ingot, and are extremely high in post-consumer recycled content. In addition, the aluminum ingot and aluminum extrusions used by Hollaender are smelted and manufactured in the United States of America.

The U.S. Army Corps of Engineers, U.S. Department of Defense, National Park Service and other divisions within the U.S. federal government & state governments regularly specify Hollaender products.

Hollaender operates two manufacturing facilities. One is located in Cincinnati, Ohio and the other is located in Somerset, Kentucky. Hollaender remains as one of the longest continuously operating aluminum sand-cast foundries in the United States. Hollaender's foundry personnel are members of the United Steel Workers Union Local 45B.

Hollaender products can be found throughout the U.S. and world in healthcare facilities, schools, parks, on bridges, dams, water treatment facilities and are used in countless architectural projects as well as specific industries like the hospitality industry, solar industry and entertainment industry.
